Dubai British School Jumeira

Client	Taaleem
Typology	Educational — K-12 Private School
Scope	Architectural Design Interior Architecture Bespoke Furniture Design Fit-Out Project Management FF&E
Plot Size	20,200 sqm.
Built-Up Area	24,500 sqm. (G+3)
Status	Complete

Dubai British School Jumeira, opened in August 2024 alongside the Dubai Canal development, epitomises the pinnacle of the Dubai British School brand, merging academic excellence with cultural and architectural integration.

The campus’s design, which combines sustainable materials and contemporary elements, reflects local cultural nuances, creating a “warm and welcoming” atmosphere conducive to holistic education. This flagship institution also boasts special features like Parent Collaboration Zones that enhance community engagement.

It has gained recognition for its architectural and design innovation, being shortlisted for the International Project of the Year at the Educational Estates Awards 2024, receiving a Highly Commended in the Public Building Category at the Identity Awards 2024, and winning accolades at the World Architecture Festival Awards 2024 and the German Design Award 2025 for its Mangrove Café.

Client	Royal Commission of Al Ula
Scope	Master Planning Interior Design Review & Analysis of all educational assets in the province Feasibility & Phased Development of Different Asset Categories
Assets	Kindegartens K-12 Schools Premium Schools Colleges (Vocational & Hospitality) Preconcept & Concept 5 Kindergartens 2 K-12 Schools 2 Interim College of Tourism & Hospitality

Harrow International School Abu Dhabi

Client	Taaleem
Typology	Educational — K-12 Private School
Scope	Architectural Design Interior Design FF&E Construction Coordination
Plot Size	70,400 sqm.
Built-Up Area	35,700 sqm. (G+3)
Status	Design Complete

The design of the Harrow International School Abu Dhabi was shaped through close collaboration with the client, with the building arranged along a linear axis to maximise visibility along the prominent roadside.

At its heart, a striking auditorium framed with expansive glazing creates a dramatic visual impact. Premium materials and finishes throughout the interiors reflect the school's prestigious status, while exceptional sports facilities and specialist-designed laboratories support holistic development and innovation. This project embodies architectural excellence, blending sophistication with functionality to create a world-class educational environment.

Harrow International School Dubai

Client	Taaleem
Typology	Educational — K-12 Private School
Scope	Architectural Design Interior Design FF&E Construction Coordination
Plot Size	54,200 sqm.
Built-Up Area	35,900 sqm. (G+3)
Status	In Development

Harrow International School Dubai is positioned at a prime location in the heart of the city, poised for rapid development and growth.

As the lead designer, köda was entrusted with the responsibility of interpreting Harrow’s distinguished legacy through an architectural language rooted in Honour, Humility, Courage, and Fellowship. Rather than replicating the historic fabric of Harrow’s original buildings, our approach seeks to express these values through thoughtful restraint, clean geometries, and a refined play of light, shadow, and proportion.

The resulting environment is dignified, contemporary, and high-performing, carefully planned to optimise thermal and acoustic conditions while offering expansive, flexible spaces that foster both academic excellence and personal growth. Rooted in a shared conceptual foundation with its sister school in Abu Dhabi, the Dubai campus is uniquely responsive to its urban context, embodying a grandeur that carries the spirit of Harrow into a new and evolving future.

Repton School Dubai

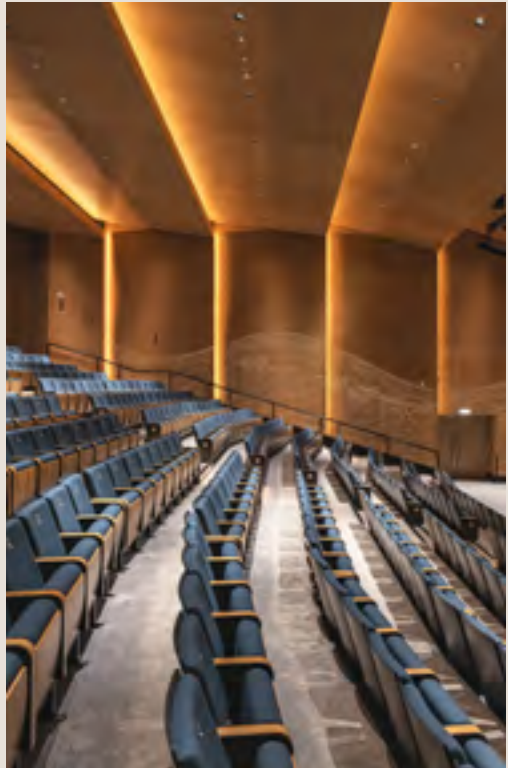

Client	Cognita
Typology	Educational — K-12 Private School
Scope	Architectural Design Interior Architecture Bespoke Furniture Design Fit-Out Project Management FF&E
GFA	120,000 sqm.
Built-Up Area	24,500 sqm. (G+3)
Status	Complete

We are appointed by Cognita to lead the design and renovation of one of Dubai’s most prestigious educational institutions. Repton, the first major British school brand to establish a presence in the region, sits on a sprawling 120,000 sqm campus—making it one of the largest school campuses in the Middle East. Despite its early promise, much of the original infrastructure remained underutilized or incomplete. Following Cognita’s acquisition of the campus, we were brought on board to unlock its full potential.

Our team undertook a comprehensive evaluation of the 18-year-old site, benchmarking it against leading schools in its tier and assessing all built assets against current academic and operational needs. This included a detailed masterplan for renovation, complete with traffic analysis, space optimization, and alignment with current and projected student enrolment. Awarded as a design and build contract, our scope encompassed architecture, interior design, and the delivery of specialized spaces such as a new Performing Arts Centre, Early Years environments, STEM blocks, and extracurricular facilities. As Lead Design Consultants, we were responsible for the full feasibility study, architectural redesign, interiors, and FF&E—reimagining the Repton campus to meet the highest standards of contemporary British education in a UAE context.

Royal Grammar School Guildford Dubai

Client	Cognita
Typology	Educational — K-12 School
Scope	Interior Design FF&E Fit-Out

In 2021, Cognita, a leading global private school group, partnered with Kidzink to create an exceptional learning environment for the newly opened Royal Grammar School Guildford Dubai (RGS GD). Located in Tilal Al Ghaf Sports City, this British curriculum school combines world-class facilities with an innovative, future-focused design philosophy rooted in sustainability.

As the Interior Design and Local Design Consultant for RGS GD, our scope included space planning, interior design, FF&E, design coordination, and fit-out supervision, delivering a cohesive, high-performance learning environment aligned with international educational standards.

Working in collaboration with Multiplex contractors, we oversaw the full interior and FF&E package from concept to completion. The project was awarded both LEED and BREEAM certifications, underscoring its commitment to sustainability and design excellence. Every space was thoughtfully designed to balance functionality, comfort, and long-term operational efficiency, supporting a future-focused educational experience.

Rashid & Latifa School

Client	Office of Presidential Affairs
Typology	Educational — Temporary Government School — K-6
Scope	Lead Design Consultant Architectural Design Interior Design FF&E Construction Coordination
Plot Size	12,000 sqm.
Built-Up Area	9,000 sqm. (G)
Status	Complete

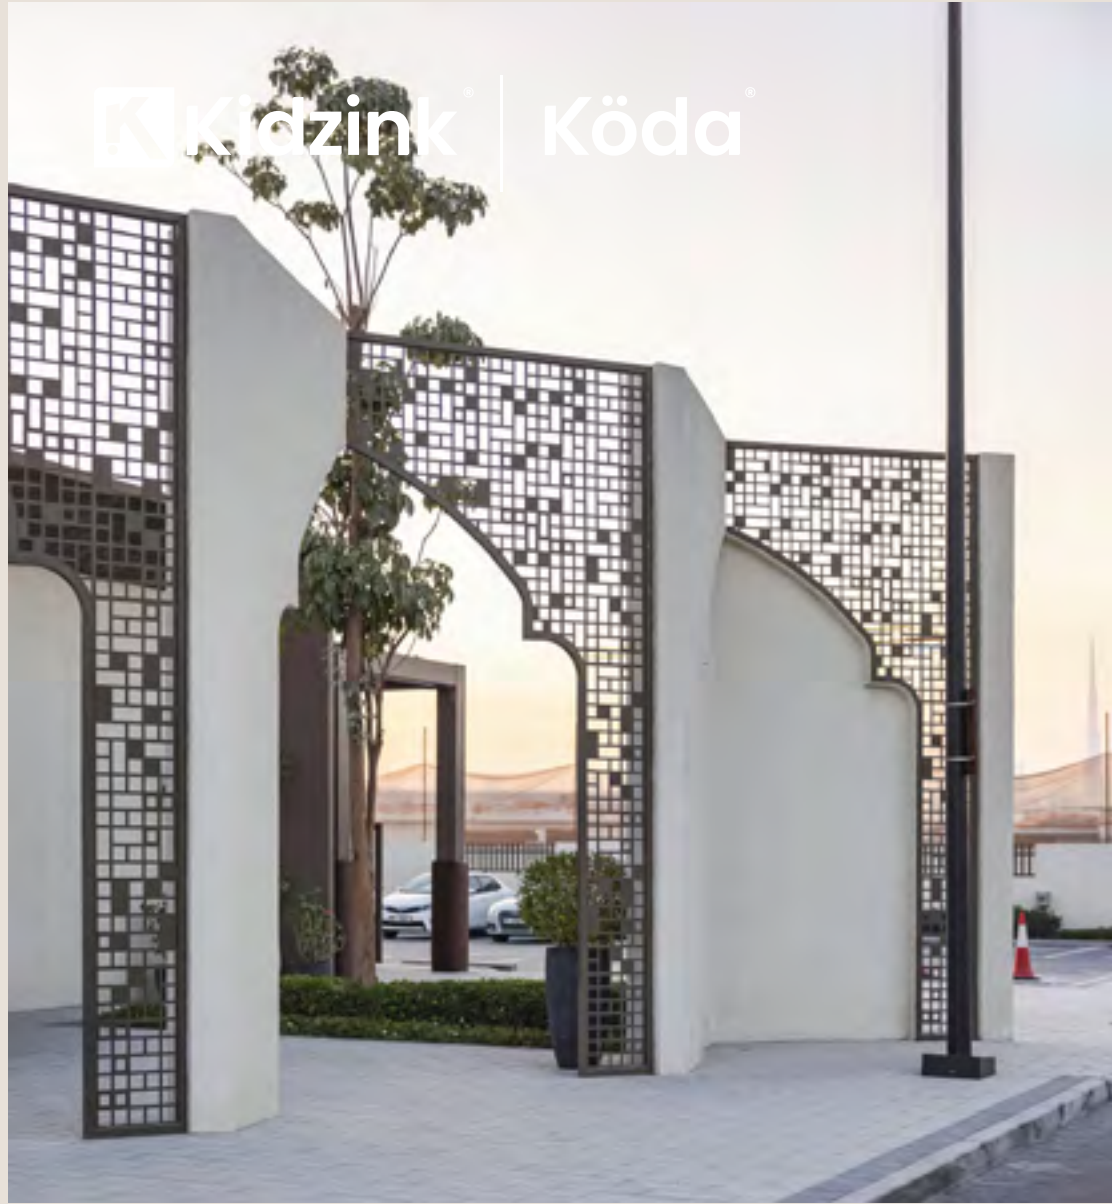

RLS is a dynamic, temporary pop-up school inspired by modern Arabic architecture.

Its entrance serves as a bold architectural gesture, setting the tone for the building, while the façade, influenced by oriental design, creates a sophisticated interplay of light, shadow, and intricate detailing, rooted in local context and cultural heritage.

The thoughtful arrangement of openings fosters a connection between interior and exterior, maintaining privacy while offering glimpses of the surroundings. Inside, the open-plan layout encourages seamless flow, allowing students to engage with the natural environment.

The multi-purpose hall at the heart of the school functions as both a canteen and communal space, bringing the school community together.

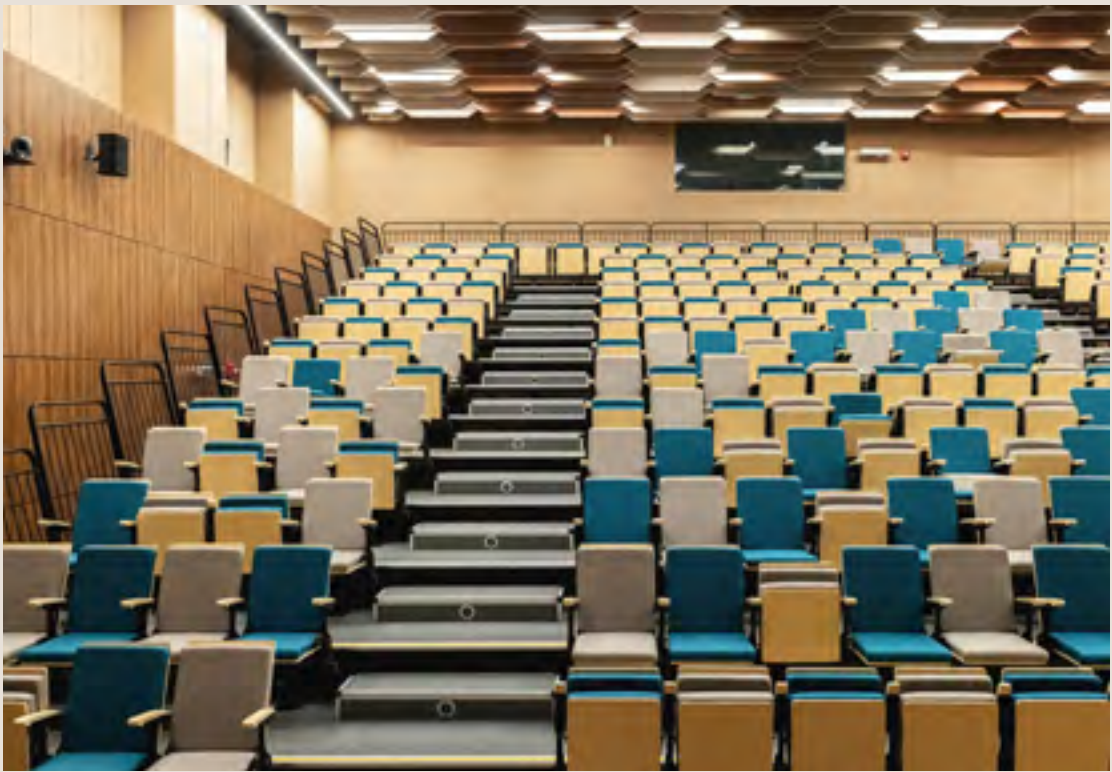

Dubai British School Mira

Client	Taaleem
Typology	Educational — K-12 Private School
Scope	Architectural Design Interior Design Construction Coordination FF&E
Plot Size	18,800 sqm.
Built-Up Area	19,800 sqm. (G+4)
Status	Complete

Dubai British School Mira is a sister institution to the Dubai British School Jumeira. While it reflects the same design language, the school enhances spatial planning and interior design to create a more refined learning environment.

Located in the vibrant Mira community, the school will serve as a premier educational facility, featuring top-tier amenities including a canteen, sports hall, and a flexible black box theatre. These spaces are designed for both functionality and versatility, supporting a variety of extracurricular activities. With an emphasis on natural light and open spaces, the school is designed to inspire creativity and foster a positive learning experience for its students.

British International School Riyadh

Client	British International School Riyadh
Typology	Educational — K-12 School
Scope	Interior Design FF&E
Plot Size	52,000 sqm.
Built-Up Area	25,000 sqm.
Status	Complete

Our firm served as the Lead Interior Design Consultant, FF&E Designer, and Furniture Supplier (end-to-end) for the complete campus redevelopment of the British International School of Riyadh (BISR), the most premium British educational institution in KSA operating under the direct guidance of the British Embassy.

The core design challenge was to create a prestigious, diplomatic-grade environment that successfully merged BISR's deep 1960s heritage with the technological modernity and aspirations of Saudi Arabia's Vision 2030, reinforcing the school's role as the core pillar of British education in the Kingdom. Our comprehensive scope covered all academic and athletic areas, delivering specialized facilities including state-of-the-art Science laboratories, innovative Maker Spaces, dedicated Art and Design Technology studios, and professional Performing Arts facilities. Crucially, the project delivered a major commitment to British sports excellence, culminating in a standalone Athletics Building that houses an Olympic-specification swimming pool and a dedicated Sports Dome for football. The resulting project is a world-class, functionally advanced educational campus that sets a new benchmark for international schooling and reflects the highest standards of British academic and cultural excellence.

The Aquila School Dubai

Client	International Schools Partnership
Typology	Educational — K-12 School
Plot Size	25,000 sqm.
Built-Up Area	18,500 sqm.
Status	Complete

Dubai British School Emirates Hills — Canteen Expansion

Typology	Educational — Campus Canteen
Scope	Architectural Design Interior Design Construction Coordination FF&E
Plot Size	3,000 sqm.
Built-Up Area	2,000 sqm.
Status	Complete

Little Andalus Jeddah

Client	Andalus Education Company
Typology	Educational — K-12 School
Scope	Architecture Interior Design Signage & Wayfinding Landscape Design Construction Coordination
Plot Size	7,000 sqm.
Built-Up Area	15,000 sqm.
Status	Complete

Little Andalus marks a strategic architectural pivot for the Al-Andalus Education Company, a premier K-12 provider with a 25-school legacy across Saudi Arabia’s West Coast. This project represents the client’s first standalone, purpose-built ECE facility. Koda was appointed to transition the brand’s traditional prestige into a high-performance, neuro-architectural environment. The design prioritizes spatial fluidity, indoor-outdoor synergy, and the “Building as a Third Teacher” philosophy.

The core architectural challenge was to move away from the “cells and bells” corridor model toward a decentralized learning landscape. Koda implemented a radial-inspired floor plan that minimizes dead-end circulation and maximizes “Passive Supervision” through transparent sightlines.

- **Activated Circulation & Breakout Hubs:** Rather than traditional hallways, the design utilizes wide, multi-functional thoroughfares. These zones are engineered as secondary learning environments, featuring integrated acoustic pods, tactile wall surfaces, and tiered seating for spontaneous peer-to-peer interaction.
- **The Montessori-EYFS Nexus:** The spatial layout supports the Montessori “Prepared Environment” by providing low-level accessibility to all resources. Classroom footprints are expanded to include “wet” and “dry” zones, allowing for a seamless transition between sensory play and structured instruction.

Al Nokhba Abu Dhabi

Client	Presidential Court of Abu Dhabi
Typology	Education — K-12 Government School
Scope	Architectural Design Interior Design FF&E Construction Coordination
Plot Size	11,000 sqm.
Built-Up Area	13,000 sqm. (G+3)
Status	Complete

Koda refurbishment of Al Nokhba School combines a regal aesthetic with functional efficiency, prioritising transparency and connectivity.

Expansive windows and glass-enclosed spaces maximise natural light, creating vibrant environments. The central canteen serves as a social hub, while the library promotes openness and exploration.

Royal colour schemes and kid-friendly furniture add warmth, while the beige aluminium façade with Abu Dhabi’s jali patterns blends tradition with modernity.

Breakout spaces, labs, and kindergarten gardens foster creativity and learning. Optimised lighting, ventilation, and flexible layouts enhance efficiency, creating a focused environment.

Kingdom Schools Riyadh

Client	Kingdom Schools under Kingdom Holdings
Typology	Educational — K-12 School
Scope	Architecture Interior Design Fit-out FF&E Project Management
Plot Size	150,000 sqm.
Built-Up Area	70,000 sqm.
Status	In Progress

Koda successfully executed the turnkey Design and Build project for the Kingdom Schools Campus Redevelopment, serving as the Lead Design Consultant, Fit-out Contractor, and FF&E Supplier for the vast 150,000 sqm campus—one of Riyadh’s largest private school modernization efforts.

The primary challenge involved functionally adapting the established institution, originally built in 2000, with minimal structural changes to seamlessly blend its institutional heritage with the technological goals of Saudi Arabia’s Vision 2030.

A cornerstone of our design was the successful integration of authentic Saudi design and art elements, achieved through a unique collaboration with the Royal Institute of traditional Arts. This comprehensive modernization delivered crucial new provisions for contemporary learning, including an IB-focused Innovation Hub for project and theory-based work, modernized Culinary and Science laboratories, specialized music rooms featuring music technology, and dedicated spaces for student welfare like the Senior Lounge and Inclusion Rooms. We also transformed the traditional library into a dynamic Multi-Media Research Hub, incorporating technology and workshop areas, creating a high-performance educational environment ready for the next generation.

Queen Elizabeth’s School Dubai

Client	GEDU
Typology	Educational — K-12 School
Scope	Architectural Design Interior Architecture Bespoke Furniture Design Fit-Out Project Management FF&E
Plot Size	33,000 sqm.
Built-Up Area	30,000 sqm.
Status	In Development

Queen Elizabeth School is a brand new premium K-12 British curriculum school opening in sports city for the 2026/2027 academic year. KODA are working on this project as a design and build architect and contractor transforming an old affordable school building into a premium offering within a highly competitive educational area.

The attention to detail needed to do this tasks a firm that must have a flawless understanding of what it means to be a premium school from a space planning and school identity side which is why KODA was selected for this project given deep regional expertise in this area. As of now the design phase has been completed and KODA/Kidzink are currently appointed as the main contractor to deliver of 60 million AED worth of civil/fitout&facade works within a 6 month timeline to get the school up and running.

Ambassador International Academy Al Barsha

Client	Bridges Education
Typology	Educational — K-12 Private School
Scope	Architectural Design Interior Design FF&E Construction Coordination
GFA	19,900 sqm.
Built-Up Area	28,800 sqm. (G+4)
Status	Complete

High density school design limited to a plot of 19,000sqm which has far of almost 1.5. Once constructed it will be the highest private school in UAE at G+5.

The design focussed on planning spaces vertically with respect to age groups and their itneraction and proximity patterns, the U-shaped building has all the public and shared facilities in the central access where classroom faces are vertically stacked on either side of this main block.

American International School Riyadh

Client	American International School Riyadh
Typology	Educational — K-12 Private School
Scope	Interior Design Fit-out FF&E
Project Area	2,000 sqm.
Status	Complete

For the American International School of Riyadh (AIS-R), Koda executed a comprehensive Design, Fit-out, and FF&E Supply project, showcasing our capabilities as a Design and Build partner.

The scope involved the full renovation of the main school library and the refurbishment of the Grade 1 & 2 academic block. The centerpiece was the creation of a Space and Exploration-themed Multi-Media Library, transforming the traditional space into an advanced research and collaboration hub engineered to support modern pedagogical practices, project-based learning, and group activities.

Concurrently, the Grade 1 & 2 block underwent a full modernization, utilizing specialized learning space zoning to create a highly flexible primary environment. This redesign incorporated dedicated areas such as a Student Support Zone, Quiet Zone, Art and Creation Zone, and Reading and Exploration Zone, ensuring every student has access to tailored environments that promote diverse learning modalities and foundational development. The resulting spaces are highly functional, future-proof, and reflective of AIS-R’s commitment to cutting-edge U.S. education standards.

Reigate Grammar School Riyadh — Western Campus

Client	ADECO
Typology	Educational — K-12 Private School
Scope	Architectural Design Interior Architecture Bespoke Furniture Design FF&E Project Management
GFA	11,870 sqm.
Built-Up Area	22,000 sqm.
Status	Design Complete

The site for the school is set to the edge of the wider masterplan, with the terrain and topography flowing generally from west to east towards the Wadi Hanifah. The proximity to the Wadi park underpins the landscape ethos of living and learning in the natural world. The connections from the landscape to the Wadi are considered integral to the design, with distant views from higher ground and physical connections from the lower ground out into the landscape.

A key component of the school design was reference to historic Arabic town planning of clustered courtyards which has been overlaid with traditional collegiate typology of a quad or court found in English schools and colleges. In Arabic architecture the courtyard also represents the ‘heart of the home’ so has been included within each school from Kindergarten to Senior Schools.

Riyadh Schools Misk City

Client	Misk Foundation
Typology	Educational — K-12 Private School
Scope	FF&E Design FF&E Supply
GFA	Two Buildings Girls 37,000 sqm. Boys 31,000 sqm.
Built-Up Area	Two Buildings Girls 55,000 sqm. Boys 43,000 sqm.
Status	Complete

This project involved designing and supplying the full furniture package for the Riyadh Schools Misk City development, a premium educational facility managed by the Riyadh Schools Group, a subsidiary of Misk Foundation, and situated within the Misk City Giga-project as part of Vision 2030.

The furniture was meticulously designed to support the school's core focus on Entrepreneurship and Innovation, requiring the creation of specialized, flexible learning environments—such as modular pods and innovation labs—to translate their ambitious vision into a world-class, functional educational space.
